## **Notice of Construction**

### **2023 Major Road Improvements**

The 2023 Major Road Improvements CAP2308 project will be constructed this spring/summer to resurface the pavement along the following streets:

Vinsetta Boulevard - Woodward Avenue to 12 Mile Road  
Normandy Road - Coolidge Highway to Crooks Road  
E. Lincoln Avenue - S. Lafayette Avenue to Knowles Street

The project includes asphalt resurfacing, concrete pavement repair, curbing, driveway approaches, sidewalk, ramps, and lawn restoration. New water main will also be installed on Normandy Road between Delemere Boulevard and Crooks Road. The contractor awarded this work is Ajax Paving Industries, Inc. of Troy, Michigan. The city's consultant, Fleis & Vandenbrink, will inspect the project.

**Construction Timeline:** Construction is anticipated to begin in **April 2023** and extend through **September 2023**. Work is currently not scheduled for Sundays or holidays.

**Parking:** During construction, there will be lane restrictions to allow for construction equipment and residential access. "No Parking – Tow Away Zone – 7:00a.m. – 8:00p.m." signs will be posted 12 hours in advance wherever required to allow for various construction operations.

**Water shutoffs (Normandy Road residents):** There will be temporary water shutoffs scheduled for connection of the new water main. Affected properties will receive a door-hanger notice with the anticipated shutoff information the day beforehand. The shutoffs typically last between 4 and 8 hours. Additionally, water to individual properties will be shutoff for a short time to connect the water service to the new water main, typically less than one hour.

**Driveways:** Driveway approaches may be removed and replaced only when necessary to match new adjacent curbing. The contractor will provide affected residents with 24-hour notice using a door-hanger, and the use of the driveway approach will be unavailable for up to two weeks for removal, replacement and curing of the new concrete. **Please DO NOT move barricades or drive on new pavement until the barricades are removed by the contractor. Property owners who remove barricades and drive on the new pavement may be billed for the cost to repair damaged pavement.**

**Trash Pickup:** Unless otherwise notified, there will be no change in the trash pickup dates and the trash will be taken care of as usual during the construction operations. If necessary, the trash may need to be moved by the contractor to the nearest intersection for pickup. **Please have address markings on all trash and recycling containers so they can be returned to the proper house.**

**Landscaping/ Restoration:** Where lawn areas have been damaged by the contractor's operations, the disturbed areas will be replaced with topsoil and seed or sod. Depending on the summer weather conditions, **restoration of the lawn areas disturbed by the construction may not begin until after Labor Day.** The city does not replace special landscaping, brick, timbers, plantings, fences or shrubs placed on city's property or within the public utility easements. The contractor will make every effort to avoid damage to any specialty landscaping that may be within the limits of construction.

**Private Sprinkler Systems:** Systems that encroach into the public right-of-way must have the sprinkler heads and lines marked by the homeowner by **April 07, 2023** prior to the start of construction. Sprinkler systems that are not marked at the time of construction and are damaged during the construction will not be repaired by the city or its contractor. The repair or replacement of damaged, unmarked sprinkler systems will be the responsibility of the property owner.

## Additional Project Details

### Vinsetta Boulevard

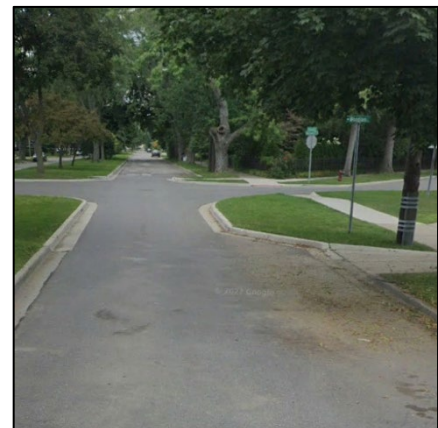

- At Woodward Avenue, Vinsetta will be reconfigured to intersect Woodward at a right-angle. After construction, drivers in the right-turn lane on Woodward will only be able to turn onto Catalpa Drive. Drivers will use the eastern most thru-lane to turn right onto Vinsetta.
- Bumpout curbing and grass will be installed at various locations along the corridor to narrow the travel lane in an effort to reduce speeding on the road:
  - Lawndale – southwest corner
  - Fairlawn – northeast corner
  - Mayfield – southwest corner
  - Mayfield – at west side turn-around
  - Greenleaf – northeast & northwest corners
  - Woodsboro – northwest, southwest & southeast corners
  - Cedar Hill Drive – northeast & northwest corners

*Vinsetta reconfiguration*

### Normandy Road

- Several median islands with plantings will be installed to calm traffic and provide easier crossings for pedestrians:
  - Just east of Edgar Avenue
  - Just west of Kent Road
  - Between Elmhurst Avenue & Linwood Avenue
  - Between Roseland Avenue & Durham Road
- The solar powered flashing beacon currently installed near Durham Road will be relocated to the new crossing island between Elmhurst Avenue & Linwood Avenue to assist with access to Normandy Oaks Park.

*Bumpout curbing example*

### E. Lincoln Avenue

- A median island with plantings will be installed just east of Troy Street to calm traffic and provide easier crossings for pedestrians.
